

Fish Bag

Instructions For Use

www.XSscuba.com

The Fish Bag clips to the back of the UFO and hangs in the water. It can stay rolled up and secure, with straps, until ready to be deployed. With welded seams and a rolled top, the bag contains the blood from speared fish, making it less likely to draw in sharks. When deployed, the bag measures 32" x 20" (81 cm x 51 cm).

Installation

Position the rolled-up Fish Bag across the back of the UFO so that it will unfurl away from the UFO. Attach the clips to the last set of upper D-rings on the side of the UFO (Fig.1). Unfurl the bag when needed and you're ready to go.
