ENGINEERED QUALITY

HIGHLAND PONY MOUNT ASSEMBLY INSTRUCTIONS

The Highland Pony Mount is engineered to carry a small pony cylinder along side of your primary dive cylinder. Attachment of the Pony Mount is secured underneath the 2" tank strap of your buoyancy compensator. The Pony Mount is designed to fit a primary cylinder with a 6.9" to 8.0" diameter. The pony cylinder mounts to the Highland Pony Mount with an adjustable length 1" nylon strap. The Pony Mount is designed to fit a pony cylinder with a 4.4" to 5.5" diameter. The quick-release buckle allows for underwater removal of the pony cylinder to the out of air diver.
