

The new and old ways of preventing ear infections caused by trapped water

The **OLD** ways

After water treatments

- Do not prevent the problem
- Kill natural bacteria needed for healthy ears
- Cause dry skin, itching and skin rash
- Reduce natural ability to fight infections
- Contain harsh ingredients like alcohol and acid

Earplugs and ear bands

Ear plugs can be effective if used properly but:

- They fall out, easy to lose
- To be effective = custom fit = expensive
- Kids refuse to wear them
- Obstruct ability to hear warnings or instruction and affect balance

The **NEW** way

Ear Pro is a **PREVENTATIVE** waterproofing ear spray used **BEFORE** entering the water.

A natural solution that helps prevent trapped water and related ear infections.

- ✓ Used **BEFORE** going into water as preventative
- ✓ Simple and effective: **just two natural ingredients**
- ✓ Safe **for kids and adults** of any age
- ✓ No harsh alcohol or silicone
- ✓ **Easy to use**
- ✓ Natural anti microbial properties that target the microbes responsible for outer ear infections
- ✓ Lasts approximately **2 hrs** per application
- ✓ No effect on hearing allowing you to react to warnings or instruction
- ✓ Does not effect balance or control
- ✓ Does not effect equalization

What makes Ear Pro different?

- ✓ **All Natural:** Mineral and essential oils
- ✓ **Simple & Safe:** Just two ingredients, safe for kids and repeated use
- ✓ **Easy Application:** Metered spray for the perfect amount every time

Ingredients

- ✓ **Formulated with simplicity and effectiveness in mind:**

Medical grade Mineral Oil that creates a water repellent layer in the ear canal

Oregano oil with 85% + carvacrol, a powerful natural antimicrobial that targets the exact waterborne bacteria and fungi causing most ear problems

- ✓ **No tolerance building, remains effective with repeated use**
- ✓ **No harsh chemicals like alcohol or silicone** that can damage the skin and destroy the natural flora needed for healthy ears
- ✓ **Reduces the need for antibiotic use, combats antibiotic resistance**

Simplicity

Preventative ear spray
used **BEFORE** going
into water

Safe for all ages

Physician approved, all
natural and reef safe

Folding nozzle, metered spray
200 sprays per bottle (100 uses)

Ear Pro doesn't impact your
hearing, balance or ability to
equalize

Ear Pro leaves your ear naturally,
there is no need to wash it out

What people are saying about Ear Pro

“ Must have! my oldest child swims M-F and this all natural protective coating has massively improved her typical swimmer ear issues. My youngest child won't go swimming or to the beach without it. Recommend you Prevent & Protect for your summer/vacation fun!

Stacia Mitchell

“ **Jared B.**
Bodyboarder, California
I always get swimmers ear during the summer months due to the warmer weater, but since using Ear Pro, my ears have never felt better and I actually want to get in the water more!

Your product is great. No ear infections since I started using it. Which is crazy since now that I wing foil, I'm in the water twice a day. ”

Paul Cooper
Foil surfer, Hawaii

”
Your product allowed me to swim, dive, and genuinely have a good time playing with my 5 year old. That is a precious memory, and one that I can now build on because of your product. I actually enjoyed swimming and playing in the pool.
