

### LT410 RECHARGEABLE DIVE LIGHT

Features wireless induction charging technology

### **Battery Installation**

Insert 1 ea. 18650 3.7V Li-ion battery with the positive "+" end facing the flashlight head. Exercise caution to get the battery polarity correct.

# Charging

- Unscrew and remove the rear cover of the light to expose the battery receiver
- Plug the charging unit into an AC 100-240V, 50/60
   Hz wall outlet
- Place the light, battery receiver end first, into the charging base.
- Charge indicator will flash green while charging and stop flashing when complete.\* NOTE: It is normal for the battery receiver and the charging unit base to become warm while charging.
- Remove from charging base when fully charged
- Do not use light while it is charging
- Inspect the o-rings to make sure that they are clean and free of any lint, hair or debris. Place a light film of silicone grease on the o-rings. This will make assembly / disassembly much easier.
- Carefully thread the rear cover back on to the body being careful not to pinch or unseat o-rings.

#### Care and Maintenance

- After each dive, rinse your light thoroughly with clean, fresh water
- If you are going to open the light, dry with towel first.
- Keep all o-rings cleaned and lubricated with a light coating of silicone grease.
- Store light in a cool place, out of direct sunlight and away from heat sources.

### Features

Power Source CREE XM-L T6
Output (variable) From 40 Im to 800 Im
Burn Time (range) 1 hour at full power
30 hours at low power
Battery 2200mAh 3.7V Li-ion Battery

Innovative Wireless Charging System
Switch Variable output magnetic slide switch

Beam Distance 292 meter / 958 feet

Beam Angle 5 degrees

Material Aircraft Grade Aluminum Alloy

Impact Resistant 1 meter

Depth Tested 100 meters / 328 feet

Length 195mm Head Diameter 47.5mm Body Diameter 31.2mm

Weight Weight 422g (including Battery)

#### Notice:

The stated data has been measured according to the international flashlight testing standards in the laboratory. The data may vary with environmental conditions.

# Warranty:

- Your XS Scuba light is covered by a full 12 month warranty.
- Within 14 days of purchase, if a fault occurs due to defect, the light will be replaced (proof of purchase required).
- After 14 days and within 12 months of purchase, your light will be repaired or replaced at the discretion of XS Scuba.
- Excluded is damage caused by incorrect battery insertion (reversed polarity), battery leakage, disassembly, modification or abuse.
